A knowledge activity for Sharp HealthCare clinicians and health care professionals interested in achieving optimal patient safety outcomes by gaining a deeper understanding on how to safely and ethically incorporate artificial intelligence (AI) into their practice.

Educational Objectives

Following this activity, participants should be able to:

- Examine how artificial intelligence can improve patient safety outcomes.
- Evaluate the potential risks and ethical implications of using AI in health care.
- Explain key challenges and barriers to AI adoption in patient safety.
- Explore current innovation and research in AI driven patient safety solutions.

Faculty/ Speakers

Gurpreet Dhaliwal, MD
Professor of Medicine
University of California, San Francisco

Zach Miller, PhD
Manager, Machine Learning and Artificial Intelligence
Northwestern Medicine

Conference Chair

Alexandra Perreiter, PharmD, MAS, BCPS, CPPS
Director of Patient Safety, Sharp HealthCare

Panel List

Moderator: Amy Adome, MD, MPH
SVP Chief Clinical & Transformation Officer
Sharp HealthCare

Panelist: Brian Lichtenstein, MD
